EMPLOYMENT HISTORY

- Software Developer** | Avant Assessment Nov 2022 - Jul 2023
Skillset: Prompt Engineering · Software Quality Assurance · Debugging Code · database operations · SQL · Object-Oriented Programming (OOP)
Project Summary: Backend Software Developer writing and maintaining SQL & Kotlin code focused on several projects. In this position I was regularly testing our applications, identifying and resolving bugs, and collaborating with our development team for effective and timely solutions to meet deadlines. I was able to communicate with our Head of Technology on a day to day basis to verify we were on schedule for all major releases and hot fixes.
- Web Developer Intern** | Prosper IT Consulting Jul 2021 - May 2022
Skillset: Front-End Development · Back-End Web Development · Bootstrap · Cross-team Collaboration · Deadline Management
Project Summary: Worked as a web developer forming a site around assisting users in finding their next ideal online video game. The website was split into sections based on genre, player retention, player-based demographic, and payment model. We Were able to communicate with senior developers through Discord and our project management was carried out using Azure DevOps. Worked on both the frontend and backend of this site seeing its full development.

EDUCATION & TRAINING

- Certification in Software Development** | The Tech Academy Sept 2022
- Immersive coding boot camp with more than 300 hours of instruction and hands-on coding experience.
- Mechanical Engineering** | Mount Hood Community College June 2015
- Studied the research, development, and tools used in the field of Mechanical Engineering.
